

AARON ATA BAAH

PROFESSIONAL PROFILE

Computer Science graduate from the University of Sussex with experience in software development, data analysis and customer-facing environments. Developed projects using React Native, SQL, JavaScript and database technologies. Interested in software engineering, cybersecurity and other technology-focused graduate roles. Strong communicator with leadership experience, analytical problem-solving skills and experience working in fast-paced team environments.

EDUCATION

University of Sussex, Falmer, UK | BSc Computer Science (Hons) | Sep 2022 – Aug 2025

Langley Park School for Boys, Bromley, UK

- A-Levels: Mathematics, Physics and Computer Science

PROJECT PORTFOLIO

Accessibility Running App (Applied Dissertation) | Sep 2024 – May 2025

- Designed and developed a cross-platform mobile application using React Native, implementing GPS-based tracking and real-time performance analytics.
- Collected and analysed user feedback from over 100 participants to improve application flow and usability.
- Conducted systematic testing across multiple devices to validate tracking consistency and identify performance bottlenecks.
- Produced technical documentation covering system architecture, risk analysis, project limitations and proposed improvements.

Antiques Website | Nov 2024

- Designed a database schema to securely store user accounts and valuation request data.
- Applied input validation and security controls to mitigate SQL injection, XSS and open redirect vulnerabilities.
- Implemented secure handling of user credentials and documented testing procedures against specified security requirements.

Hack Sussex Hackathon | Feb 2024

- Co-developed a browser-based application using JavaScript and Pixi.js during a 24-hour Agile development sprint.
- Implemented interactive user interface components and resolved rendering issues under strict time constraints.
- Collaborated within a cross-functional team and presented the solution to over 300 attendees.
- Awarded Most Creative Project.

WORK EXPERIENCE

University of Sussex Students' Union & Co-op | Store Assistant | Aug 2023 – Aug 2025

- Supported daily store operations including stockroom organisation, food safety compliance checks, cash handling and customer service.
- Suggested dynamic pricing for food approaching expiry dates to help reduce waste.
- Conducted customer surveys to identify purchasing trends and supported the introduction of a new product line.
- Selected as a scoring panel member responsible for screening and evaluating new staff candidates.

PROFESSIONAL INSIGHT EXPERIENCE

Hastings Direct – Data Analyst Work Shadowing | Jun 2026

- Observed the practical use of SQL, Pivot Tables and Natural Language Processing techniques to organise and analyse business data.

Aaronata.baah1@gmail.com | 562 302 9262

- Discussed the process of cleaning, validating and preprocessing raw datasets to improve data quality prior to analysis.
- Explored how analytical techniques are used to identify risk factors, support pricing decisions, increase revenue and reduce losses.
- Investigated patterns within customer datasets and discussed how analytical findings can be communicated effectively to business stakeholders through reports and visualisations.

Barclays – Internal Audit Work Shadowing | Jun 2026

- Shadowed an AVP within the Global Markets Audit team and observed the audit lifecycle including planning, fieldwork and reporting stages.
- Learned how auditors assess internal controls, identify operational risks and evaluate control effectiveness.
- Observed examples of transaction testing and risk-based review processes used within financial services.
- Discussed opportunities to automate manual audit testing and control monitoring through data analysis and scripting techniques.

LEADERSHIP & ACTIVITIES

University of Sussex Students' Union | Events & Welfare Manager | Sep 2024 – Sep 2025

- Organised and led weekly running events for approximately 30 participants, promoting student engagement and wellbeing.
- Managed a £200 budget and negotiated venue discounts to maximise value while controlling costs.

SKILLS & ADDITIONAL INFORMATION

Technical Skills: Python, SQL, Java, C++, JavaScript, React Native, HTML, CSS, Microsoft Excel (Pivot Tables, XLOOKUP), Git, Database Design, Data Analysis, Data Cleaning & Validation

Awards & Certifications: International Digital Certification, President's Scout Award, Silver Duke of Edinburgh Award
